

# FRESH BREWED MEDIA

**Fresh Brewed Media's** financial-based content is grounded in methodical exhaustive research systems and procedures used by their analysts who are equipped with an intelligent set of market analysis tools—giving them a commanding view of the markets and potential investment opportunities.

Their unique approach has a bias to actionable news, alerts, strategies and ideas that leverage the benefits of hedged investments to reduce risk while maximizing potential profit. It is this conservative approach that makes their content unique.

Fresh Brewed Media strives to fill the gaps in market reporting by publishing information that uses both technical and fundamental analysis along with their unique proprietary systems to produce content that is ahead

of the market. They leverage market news, economic forces, trading trends and equity research to produce reports that identify specific tactics investors can use today.

Available from Comtex are Fresh Brewed Media's **NewsBites**, brief stock reports that may contain details regarding recent or anticipated stock moves, resistance and support price levels, insider trades, upgrades, downgrades and other news.

Reports also include hedged trade ideas designed to potentially protect investors from unexpected market shifts. These reports offer not only stock news but strategies that hedge investments against uncertainty.

NewsBites from Fresh Brewed Media are available from Comtex in several finance related **CustomWires®** and are available as a **Full Feed** offering.
