Alternative Magazine Online	Alternative Magazine Online is now officially a real site. Thousands of visitors, a thriving community, several new writers joining me... these are exciting times. My original introduction mentioned how things on here were 'slightly barren, so lets see how much we can make this thing grow'. Well, it turns out we can grow a lot! We have (often exclusively) interviewed authors, directors, designers, musicians and many more creative minds. We have reviewed PC, iPhone, Xbox360, PS3 and Wii games. We have made contacts with distributors, book publishers and game designers. Things are not slowing down at all, if anything they are speeding up. I couldn't be more excited and I thank our readers and affiliates for making this possible. As an aspiring writer/ journalist... you have all humbled me tremendously.	http://alternativemagazineonline.co.uk

Antiwar.com News Articles	This site is devoted to the cause of non-interventionism and is read by libertarians, pacifists, leftists, "greens," and independents alike, as well as many on the Right who agree with our opposition to imperialism. Our initial project was to fight against intervention in the Balkans under the Clinton presidency. We applied the same principles to Clinton's campaigns in Haiti and Kosovo and bombings of Sudan and Afghanistan. Our politics are libertarian: our opposition to war is rooted in Randolph Bourne's concept that "War is the health of the State." With every war, America has made a "great leap" into statism, and as Bourne emphasized, "it is during war that one best understands the nature of that institution [the State]." At its core, that nature includes an ever increasing threat to individual liberty and the centralization of political power.	http://antiwar.com/

CryptoDaily	Crypto Daily is the leading crypto and blockchain news site that 'bridges' the gap between companies, users and enthusiasts. Determined to achieve its media objectives in the most independent and extensive way possible, Crypto Daily operates under a symbiotic hybrid model, in which the support of the aforementioned stakeholders allows for much more diverse and interesting information to reach the masses, and under one banner. Founded in 2017, Crypto Daily originally started as the world's first free-to-publish crypto news platform, and operated under this model in response to what it deemed as the centralization of information by the largest media outlets. However, owing to the financial demands of running a full time media website, the free-to-publish model was not sustainable enough in which to continue bringing diverse content to the masses. For this reason, Crypto Daily has since opted for a new model which it believes will not only allow for more diverse news to reach the masses, but one which will allow for more companies and projects to get the coverage that they deserve. Quite simply, Crypto Daily is aiming to cover more news and information than what other outlets are currently providing, and through the unique benefits associated with Crypto Daily's hybrid model, it is the outlet's ambition to become the number one news and information resource for the crypto and blockchain sphere. It is important to note that Crypto Daily's journalistic operations will continue to remain neutral, and under no circumstances will the editorial team be influenced or pressured by any media patron when conducting journalistic pursuits.	https://cryptodaily.co.uk/

EDI Readable Corporate Action Notices (RCAN)	EDI's Readable Corporate Action Notice (RCAN) product offers 'readable' documents that combine all the data elements that would be contained within a typical corporate actions data feed (e.g. a Microsoft Excel, CSV, or XML file), but instead, presents these elements in a human-readable form, similar to a news feed. Unlike in typical corporate actions feed records, where the parts are separated out and need to be re-linked within a client-side database, the RCAN is a complete message, where all the disparate parts are pulled together. RCAN covers 45 crucial corporate events (inc. Dividends, Mergers and Acquisitions, Rights Offering (Issue), Spin-Offs, Stock Splits, Reverse Stock Splits, New Listings (IPOs), Suspensions and Delistings etc.) and aggregates corporate actions from over 150 exchanges worldwide. Notices are produced 4 times per day in line with EDI's incremental feed production times.	https://www.exchange-data.com/product/readable-corporate-action-notice/

We follow the meteoric rise of Oliver Cromwell and his New Model Army, as well as the tragic decline of Charles I – a king executed by his own subjects. We also investigate how the countries were transformed during the period of Interregnum, for better and for worse, before taking a look at how the monarchy made a stunningly peaceful return during the Restoration. Muscat Daily	Launched on October 10, 2009, Muscat Daily is today the largest selling newspaper in the Sultanate of Oman. Muscatdaily.com is the online version of the 28-page daily broadsheet that is published by Oman's top publishing house, Apex Press and Publishing, and is meant for those who want to follow the latest news about Oman online. Muscat Daily changed the newspaper industry in a country where the existing papers did not cover political or crime news as well as sensitive regional news. Our belief in the importance of local news has paid off as we rocketed from the fourth English daily newspaper in the country at the time of launch to the No. 1 position in less than a year – possibly a world first for any market. The paper has won accolades for its bold and unbiased coverage of various issues including the Oman Protests of 2011 - being the only newspaper to cover the protests from its beginning - and its political and economic fallout. Nieman Journalism Lab	The Nieman Journalism Lab is an attempt to help journalism figure out its future in an Internet age. The Internet has brought forth an unprecedented flowering of news and information. But it has also destabilized the old business models that have supported quality journalism for decades. Good journalists across the country are losing their jobs or adjusting to a radically new news environment online. We want to highlight attempts at innovation and figure out what makes them succeed or fail. We want to find good ideas for others to steal. We want to help reporters and editors adjust to their online labors; we want to help traditional news organizations find a way to survive; we want to help the new crop of startups that will complement — or supplant — them. We are fundamentally optimistic. We don't pretend to have even five percent of all the answers, but we do know a lot of smart people. Primary among them are our readers; we hope your contributions will make the Lab a collaborative exchange of ideas. Tell us what's happening around you, or what should be. We hope you enjoy the work we do, and that you'll join the conversation as it evolves.	https://www.niemanlab.org/

PubMed	PubMed is a free resource supporting the search and retrieval of biomedical and life sciences literature with the aim of improving health—both globally and personally. The PubMed database contains more than 35 million citations and abstracts of biomedical literature. It does not include full text journal articles; however, links to the full text are often present when available from other sources, such as the publisher's website or PubMed Central (PMC). Available to the public online since 1996, PubMed was developed and is maintained by the National Center for Biotechnology Information (NCBI), at the U.S. National Library of Medicine (NLM), located at the National Institutes of Health (NIH). Citations in PubMed primarily stem from the biomedicine and health fields, and related disciplines such as life sciences, behavioral sciences, chemical sciences, and bioengineering. PubMed facilitates searching across several NLM literature resources, including MEDLINE, which is the largest component of PubMed and consists primarily of citations from journals selected for MEDLINE; articles indexed with MeSH (Medical Subject Headings) and curated with funding, genetic, chemical and other metadata. Another major component to PubMed are citations from PubMed Central (PMC) articles. PMC is a full text archive that includes articles from journals reviewed and selected by NLM for archiving (current and historical), as well as individual articles collected for archiving in compliance with funder policies.	https://pubmed.ncbi.nlm.nih.gov/

Saudi Stock Exchange (Tadawul)	Saudi joint stock companies had their beginnings in the mid 1930's, when the "Arab Automobile" company was established as the first joint stock company. By 1975 there were about 14 public companies. The rapid economic expansion, besides the Saudisation of part of the foreign banks capital in the 1970's led to the establishment of a number of large corporations and joint stock banks. The market remained informal, until the early 1980's when the government embarked on forming a regulated market for trading together with the required systems. In 1984, a Ministerial Committee composed of the Ministry of Finance and National Economy, Ministry of Commerce and Saudi Arabian Monetary Agency (SAMA) was formed to regulate and develop the market. SAMA was the government body charged with regulating and monitoring market activities until the Capital Market Authority (CMA) was established in July 2003 under the Capital Market Law (CML) by Royal Decree No. (M/30). The CMA is the sole regulator and supervisor of the capital market, it issues the required rules and regulations to protect investors and ensure fairness and efficiency in the market. The Council of Ministers approved on the 19th of March 2007, the formation of The Saudi Stock Exchange (Tadawul) Company.
